EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

In claim 19, lines 4-5, "a dose indicator" has been changed to -- the dose indicator --.

In claims 20 and 21, in the beginning of each claim, "A device" has been changed to -- The fluid dispenser device --.

2. The following is an examiner's statement of reasons for allowance: Claims 1-21 are allowed because the prior art of record does not disclose or suggest a dose indicator for a fluid dispenser device comprising a body; an actuator; a cylindrical indicator element, actuator means; wherein the dose indicator is characterized in that one amongst the actuator and the actuator means includes at least one actuator member that is partially oblique relative to the direction of displacement in translation of said actuator means, said at least one actuator member co-operating with at least one complementary actuator member provided on the other one amongst the actuator and the actuator means, so that a

displacement in translation of the actuator means is transformed into said actuator turning, and in that said actuator member comprises an oblique portion that enables the dose to be counted, and a rectilinear portion disposed after said oblique portion in the actuation direction of said actuator means, said rectilinear portion enabling the actuation stroke of the device to be continued after the dose has been counted; and in combination of the rest of limitations in claim 1.
